

ABSTRACT

Topic: **Art-cafe**

Technology: django(python)

Database: sqlite

Most people today have extremely busy lives finding no time to do even basic chores during work hours. After work, there is only time to rush home rather than walk into art gallery for exhibition. The project entitled ART-CAFE is a website which provides a high quality online service and a best place to meet both for the art lovers and the artist. This site enables us to purchase different artwork from various collections. Artist can upload artworks and users can buy the artwork.

This project has three modules:

1.Admin

2.Artist

3.User
